

National University of Computer and Emerging Sciences, Lahore Campus

Course:	Theory of Automata	Course Code:	
Program:	BS(Computer Science)	Semester:	Spring 2024
Due Date:	10 th Feb, 2024 (Google Classroom)	Total Marks:	180
Section:	6A	Weight	%
Exam:	Assignment 1	Page(s):	1
		Reg. No	

Instruction/Notes: This is handwritten assignment, which should be submitted in Google classroom. Show proper working.

Problem # 1:

Suppose $\Sigma = \{a, b\}$, $n_a(x)$ is the number of a's in string x and $n_b(x)$ is the number of b's in string x . The following languages are defined over Σ as (all languages are a subset of Σ^*):

$$L_1 = \{x \mid n_a(x) \text{ is even}\}$$

$$L_2 = \{x \mid n_a(x) = 2 \ \& \ n_b(x) = 2\}$$

$$L_3 = \{x \mid n_a(x) = 0 \ \& \ n_b(x) \text{ is odd}\}$$

$$L_4 = \{x \mid n_a(x) \text{ is odd}\}$$

$$L_5 = \{x \mid |x| \leq 2\}$$

$$L_6 = \{x \mid |x| = 1\}$$

$$L_7 = \{aa, ab, aba, bb\}$$

$$L_8 = \{aaa, bb\}$$

- Which of the above are infinite/finite sets. Read about countable and uncountable sets and identify which ones are countable.
- Write down all members of the countable finite set.
- Write down $L_7 L_8$, $L_6 L_8$, $L_5 L_8$,
- Give L_8^0 , L_8^1 , L_8^2 ,
- Find $L_7 \cap L_8$, $L_6 \cap L_8$, $L_5 \cap L_8$, $L_1 \cap L_2$, $L_3 \cap L_4$
- Find the complement the first three languages
- Find $L_7 \cup L_8$, $L_6 \cup L_8$, $L_5 \cup L_8$, $L_1 \cup L_2$, $L_3 \cup L_4$
- Find $L_7 - L_8$, $L_6 - L_8$, $L_4 - L_5$, $L_1 - L_3$

Problem # 2: Draw deterministic finite automata

$$L = \{x \mid x \text{ over } \{a, i, n, g\}; x \text{ ends with 'ing'}\}$$

$$L = \{x \mid x \text{ over } \{0, 1\}; x's \text{ 2nd last digit must be '0'}\}$$

$$L = \{x \mid x \text{ over } \{a, b\}; |x| \text{ is divisible by 2}\}$$

$$L = \{x \mid x \text{ over } \{a, b\}; |x| \text{ is divisible by 3}\}$$

$$L = \{x \mid x \text{ over } \{a, b, c\}; x \text{ contains 'aa' as a substring}\}$$

$$L = \{x \mid x \text{ over } \{0, 1\}; \text{In every 'x' of sequence 3 it contains exactly one '0'}\}$$

$$L = \{x \mid x \text{ over } \{0, 1\}; x \text{ as decimal number divisible by 2}\}$$

$L = \{ x \mid x \text{ over } \{0,1\} ; x \text{ as decimal number divisible by } 3 \}$

$L = \{ x \mid x \text{ over } \{0,1\} ; x \text{ as binary number divisible by } 2 \}$

$L = \{ x \mid x \text{ over } \{0,1\} ; x \text{ as binary number divisible by } 3 \}$
